

Capabilities

We are experts in **passive seismics**:

- Natural and induced seismicity monitoring
- Subsurface imaging with ambient noise
- Survey and network design
- Network installation and maintenance
- Web-app for secure data visualization
- Integration with geomechanical models
- Automatic and manual data processing
- Advanced detection and location methods

Differentiators

- Cost-effective
- Open formats, accountable algorithms
- In-house software solutions (no additional license fees!)
- Advanced geophysical processing methods
- Multidisciplinary view, including academia
- Fully secured IT infrastructure, data always remain in the country of the project

Past performances

- 15+ Site characterization studies
- 15+ Networks designed
- 25+ passive seismic data processing projects
- 5 Long-term networks fully operated
- 5 realtime seismic monitoring projects 24h/7d

Values

- Quality
- Passion
- Innovation
- Sustainability
- Accountability

Staff

- 15+ people
- Experience up to 40 years
- Geophysicists
- Modelling specialists
- Software engineers

Offices

- Italy (HQ)
- Germany
- Switzerland
- France
- Turkey

**Reliable partners
for your
subsurface
projects**
